

Trey AI Widget — ALL■IN■ONE (Windows) — 1■Page Runbook

0) Prereqs

Install Node.js LTS. Install Ollama (Windows). In PowerShell:

```
node -v npm -v ollama --version
```

Pull models: `ollama pull llama3:8b` && `ollama pull mxbai-embed-large`

1) Unpack & Configure

Unzip the bundle (e.g., `C:\trey\Trey_AI_Widget_Pro_Windows`).

copy `.env.sample` `.env` → set `WIDGET_SECRET` (admin password).

2) Install & Index (optional)

```
npm install
```

```
npm run index # build tiny SQLite RAG index; safe anytime
```

3) Run (dev mode)

```
npm run dev → API http://localhost:3000 UI http://localhost:5173
```

4) Admin Login

Open `http://localhost:5173/admin.html` → paste `x-admin-secret` (`WIDGET_SECRET`).

5) Create First Key

Name + Role (viewer/power). Optionally set quota/day, per■key webhook, threshold.

Click Create Key → copy key.

6) Test Chat

```
curl -X POST http://localhost:3000/api/trey -H "Content-Type: application/json" -H "x-api-key: YOUR_KEY" -d '{"messages":[{"role":"user","content":"Hello"}],"stream":false}'
```

7) Alerts

In Global Settings: set Slack webhook (pretty alerts) and/or global webhook (JSON). Threshold default 80%% (UTC day).

8) Test Alerts

Admin → Test Alerts: choose threshold/exhausted, optional key name/id → Send Test Alert. Check Slack/webhook receiver.

9) Analytics & Logs

Admin shows per■key 60■min chart. CSV: `/api/metrics/csv`. Logs: `/api/logs/current` (also in `./logs/`).

10) Service (optional)

Install NSSM then: `scripts\register-service.bat "C:\path\to\nssm.exe"`. Remove with `unregister-service.bat`.

Hardening

Change `WIDGET_SECRET`; firewall restrict; avoid admin-proxy keys; rotate keys. Quota resets at UTC midnight; rate limits per key + global.
